the claims, and in view of Applicant's further clarification of the terms described in the specification.

Allowable Subject Matter

Claims 17-30 are allowed. Claims renumbered 1-14.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious and integrated circuit, IC and a method recited in the independent claims 17 and 27, as presently amended, including among other limitations, "a pin is relinquished by the after package trim circuit after the first time interval, wherein the pin remains actively available to the IC for a second function after the first time interval".

Independent Claim 21 recites an after package trim circuit, including among other limitations, "the after package trim cell circuit array responsive to an input signal representative of the trimmed reference signal within a predetermined range of a high precision reference signal to set the trim cell circuit array digital signal equal to a value of the test signal that results in the trimmed reference signal within the predetermined range of the high precision reference signal".

Consequently, claims 17-30 are allowed over the prior arts of record.
